### Drug Related Scenarios

**1. Meena was given a large amount of cannabis by her boyfriend. She is going out with friends straight from school so has hidden the cannabis in her bag so she can share it with them later.**

- What will happen if the school find out?
- What could happen if the police find out?
- What effect could cannabis have on her/her friends?

**2. Andy has never taken drugs before – but a lot of his friends take ecstasy regularly. They are out together when one of Andy’s friends starts to look very unwell. He looks very pale and sweaty. He reassures Andy he feels OK, and that he’s never been badly affected by ecstasy before.**

- What could Andy do?
- Why might be happening to his friend?
- How does ecstasy affect users?

**3. Lately, Kris has been feeling stressed out and down. There is a lot of pressure on him and he feels he is going to do badly in his GCSEs. His dad wants him to go to university. After a bad night out drinking at a friend’s house he comes home to find the house empty. In the bathroom he finds his mum’s prescription tranquilisers that she’s been taking for years. He decides to give one a go to see if they help him.**

- What could happen to Kris?
- How to tranquilizers affect users?

**4. Alex has been training hard but thinks he still doesn’t look as muscular as his friends. One of his mates says he’ll never do any better unless he does what everyone else does, which is to take anabolic steroids. Alex asks how he could do this, and his mate invites him to join their circle where each person injects the person to his left.**

- What could happen to Alex?
- How do anabolic steroids affect users?

**5. Jasmeet has a group of friends she hangs around with. There is nothing to do around her estate. They sometimes get drunk most of them smoke. Jasmeet doesn’t because it makes her asthma worse. For a laugh they start inhaling lighter fuel. Jasmeet wants to try it.**

- What could happen to Jasmeet?
- What could happen if they are found?
- How does inhaling lighter fuel affect users?

**6. A group of friends are really into the dance scene and regularly take ecstasy together, with one of them taking it in turns to get the pills for everyone else. One night, instead of ecstasy they get Special K (ketamine). The dealer said it was like E. They can’t really see any difference between the pills.**

- What could happen if they took ketamine?
- What could happen if the police found out about their normal activity, or this evening’s deal?
- How does ketamine affect users?
